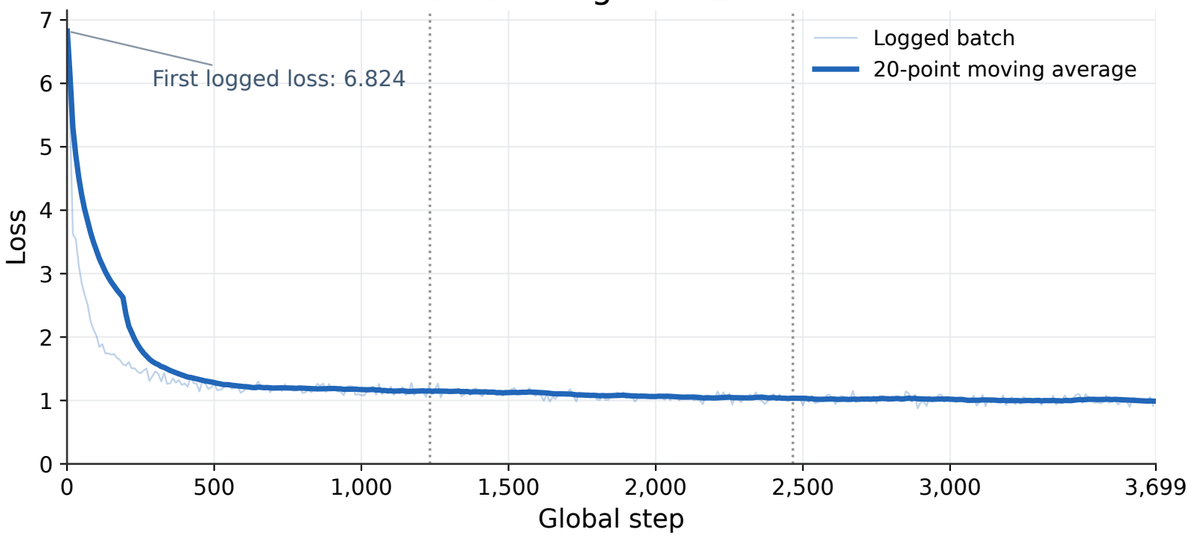
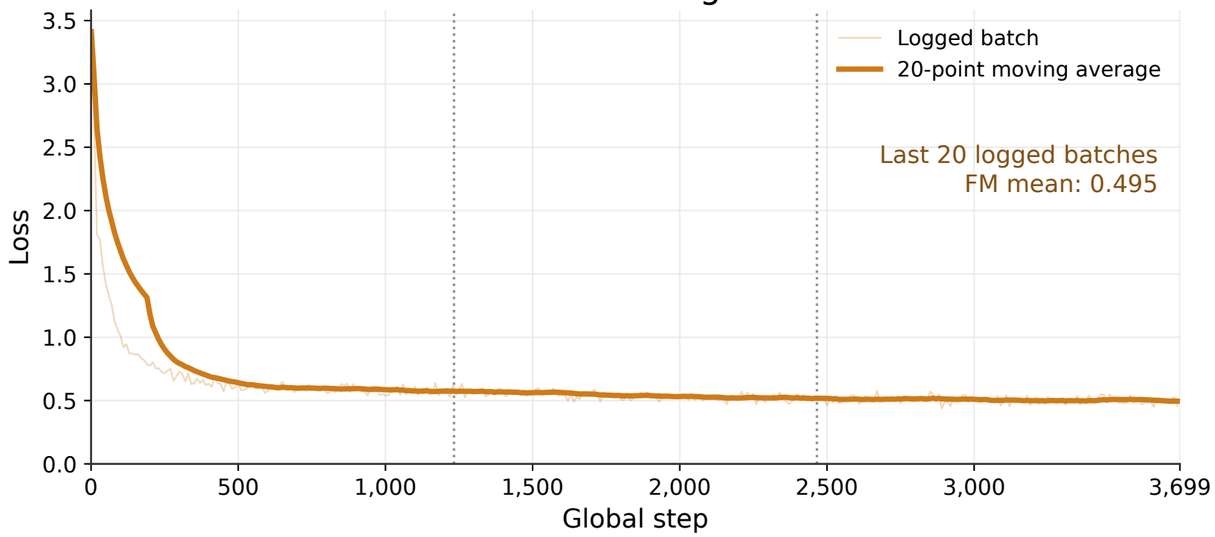
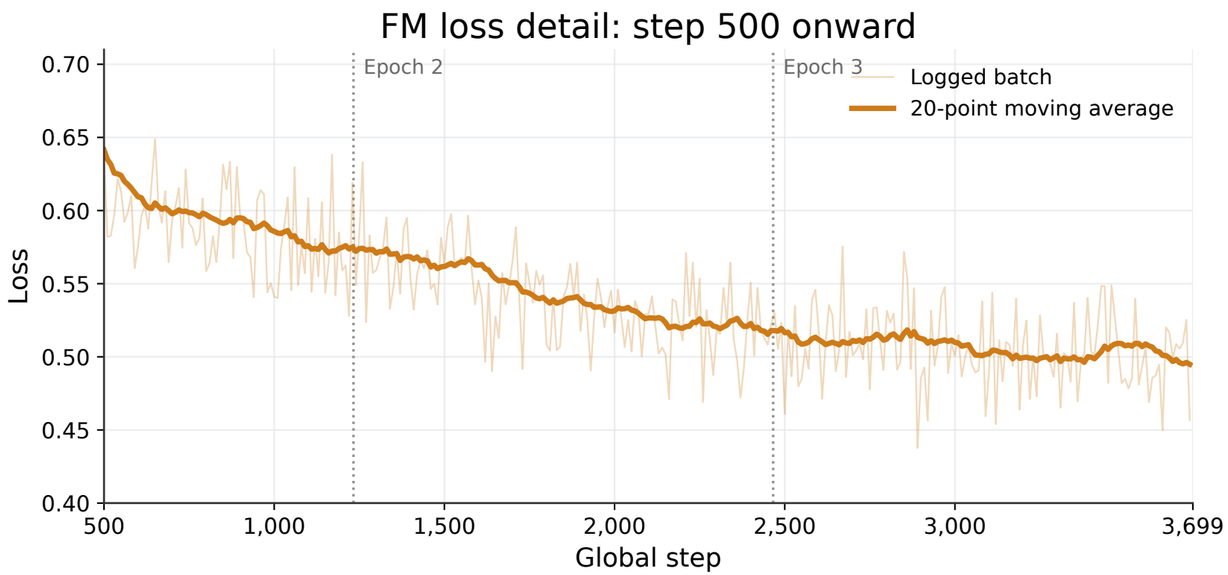
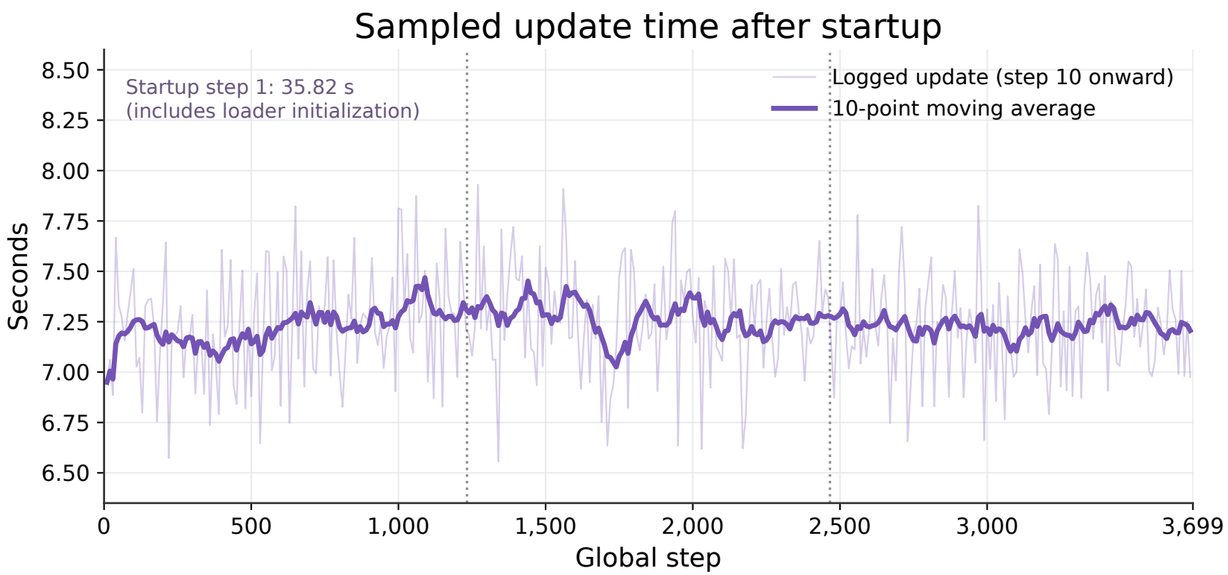
BetaNav | Frozen VLM + FM only | 8 GPUs | global batch 512

Completed 3,699 updates / 3 full epochs | Original LightNav + fresh FM expert









Thin lines: logged batches (step 1, then every 10 steps). Thick loss lines: trailing 20 points (~200 steps).

Dotted lines: epoch boundaries at 1,233 and 2,466. Training loss only; CE is zero and the complete VLM is frozen.

All 370 expected log points are present, covering steps 1 through 3,690. Final training checkpoint: step 3,699.
