
R2R: frozen LightNav VLM + trained FM and StopHead
8 GPUs | 3 epochs | global batch 512 | completed checkpoint: step 3699
Epoch 2
Epoch 3
Observed logged update
Trailing 100-step mean of log records
Total training loss
FM loss
Weighted STOP BCE
Global optimizer step
370 observed records: step 1, then every 10 steps through 3690. Steps 3691–3699 have no loss record.
Training loss only; navigation SR/OS and STOP accuracy require separate evaluation.
